EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 11-14 have been canceled as the claims are directed to a non-elected invention and the application is otherwise in condition for allowance.

On Fig. 7, the status identifier "Replacement Sheet" has changed to New Sheet since Figure 7 is newly submitted.

2. The following is an examiner's statement of reasons for allowance: While it is known in the art to provide a preformed pond liner configured to provide a self-contained pond having a preselected volumetric capacity, a plenum configured to fit within said preformed liner, said plenum configured to provide a reservoir of pressurized water, an underwater filter adapted to fit within said plenum, said underwater filter inherently containing a filter material, said underwater filter configured to transmit water to said pond (via openings in the filter), a pump configured to circulate water through said plenum, said pond and through a filter (see, for example, US Pat No 6,461,501 to Porter), and it is known in the art to use shredded plastic frass in a filter (see, for example, US Pat No 3,727,769 to Scholl), in the examiner's opinion, the prior art fails to teach or fairly suggest the filter having interconnected chambers being filled with shredded plastic frass filter media. The instant invention provides the

advantages disclosed by applicant in paragraph [0032] of the instant specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
